

TILT 25th
Anniversary
2019

The future is now

The Sponsorship Package

Technology is transforming society on many fronts. In recent years, we have seen the sustained move from atoms to bits, rise of social media and the sharing economy, and the rapid development of cloud computing, big data, smart devices, and robotics. Along with these developments we see a continuous stream of new legal and regulatory issues. For every problem solved, two new problems seem to surface.

During 2019, TILT will celebrate its **25th Anniversary**, with festivities throughout the year. Every month will have a different focus, bringing together researchers, practitioners, policy makers, and civil society at the intersection of law and regulation, technology, and society to share insights, exchange ideas and formulate, discuss and suggest answers to contemporary challenges related to technological innovation.

The **25th Anniversary** features of 10 months of festivities and the TILTing conference in May. Each month will have its own focus, such as Health, Intellectual Property, Artificial Intelligence, Surveillance, the Future of Privacy, and Dumb Cities. All the themes will feature a keynote lecture, guest professor, workshop, book reading, public lecture and film screening.

For a more detailed overview of all activities we are happy to refer to our **TILT 25th anniversary plan**.

The mission of TILT is to explore and understand the interplay between technology, regulation and fundamental values/human rights; to study emerging technologies, their impact on the individual and society; and to assess the need for regulation of technologies. Established in 1994, TILT has built a serious reputation in research, enabling the development of a leading program in Law & Technology. TILT's expertise covers a wide range of topics related to developments in ICT and nano-, bio-, neurotechnology and robotics -technologies that are currently flourishing thanks to their rapidly evolving ICT infrastructures.

The sponsorship package

Our sponsorship packages offer the unique opportunity to be an active and visible supporter in the center of the technology law universe: Tilburg.

Sponsors have the opportunity to learn about the research of the world's leading scholars in the field. Each sponsorship package is designed to meet the demands of academic independence and sponsor visibility. Three packages are available: Lithium, Tantalum and Silicon.
